Art Unit: 2652

Claims 1 to 24 are pending.

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the shield associated with the write device set forth in claims 7-13 and 24 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. Claims 7-13 and 24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 7 sets forth "a shield associated with said write device", however outside of claim 7 there is no discussion or depiction in the disclosure of such an embodiment and the mere broad mention of such a structure in claim 7 is not considered adequate to provide enablement in the present situation of how such a structure would be arranged and would operate, particularly when considering the differences in the extent and function of perpendicular write element structures versus perpendicular read element structures.

Allowable Subject Matter

3. Claims 1-6 and 14-23 are allowed. Claims 7-13 and 24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, first paragraph, set forth in this Office action.

4. Response to arguments filed 3-15-2004

Applicant argues that claim 7 has been amended so that the shield is no longer claimed as partially surrounding the write device and that claim 7 now refers to a perpendicular magnetic head rather than a perpendicular magnetic write head.

In response the Examiner notes that claim 7 still includes the language "a shield associated with said write device" and as the specification and drawings include no disclosure involving a write device interacting with a shield, it can not be adequately determined what the structure of the write device is, what the structure of the shield is, and what is meant by "associated".

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
